

tesseract_planning
::Profile

```
graph BT; A[tesseract_planning::FixStateBoundsProfile] --> B[tesseract_planning::Profile];
```

The diagram illustrates an inheritance relationship between two classes. At the bottom is a gray box representing the base class, `tesseract_planning::FixStateBoundsProfile`. A blue arrow points upwards from this box to a white box at the top, which represents the derived class, `tesseract_planning::Profile`. This indicates that `FixStateBoundsProfile` inherits from `Profile`.
