

tesseract_task_composer
/core/include/tesseract
_task_composer/core/task
_composer_server.h

```
graph BT; A["tesseract_task_composer  
/core/src/task_composer  
_server.cpp"] --> C["tesseract_task_composer  
/core/include/tesseract  
_task_composer/core/task  
_composer_server.h"]; B["tesseract_task_composer  
/test/tesseract_task_composer  
_core_unit.cpp"] --> C;
```

The diagram illustrates a dependency structure where two source files, `_server.cpp` and `_core_unit.cpp`, both include the header file `_composer_server.h`. The header file is located in the `core/include` directory, while the source files are in `core/src` and `test` respectively. The header file box is shaded gray, and the source file boxes are white. Blue arrows point from the source files to the header file.

tesseract_task_composer
/core/src/task_composer
_server.cpp

tesseract_task_composer
