

tesseract_planning
::Profile

```
graph BT; A[tesseract_planning::TrajOptIfoptOSQPSolverProfile] --> B[tesseract_planning::TrajOptIfoptSolverProfile]; B --> C[tesseract_planning::Profile];
```

The diagram illustrates an inheritance hierarchy for tesseract_planning profiles. It consists of three rectangular boxes arranged vertically. The bottom box is shaded gray and represents the base class. The middle box is white and represents an intermediate class that inherits from the base. The top box is white and represents the final profile class that inherits from the intermediate one. Blue arrows point upwards from the middle box to the top box, and from the bottom box to the middle box, indicating the direction of inheritance.
